

## Moringa Information sheet

ASAP Africa has been teaching rural communities about the benefits, uses and how to cultivate *Moringa Olifera* since 2003.

“Once-for-ounce Moringa leaves contain more Vitamin A than carrots, more calcium than milk, more iron that spinach, more Vitamin C than oranges and more potassium than bananas” According to the Trees For Life Organization

Today there is little doubt about the medicinal properties and health benefits of consuming Moringa leave powder in places threatened by starvation. Sometimes referred to as the “drumstick tree”, it has been proven to be effective to treat a multitude of ailments

including headaches, inflammation, intestinal disorders just to name a few.

*The pods and leaves of the fast-growing Moringa tree have many medicinal properties*

In addition, *Moringa* has been used to purify water by households for centuries. During recent commercial trials, powdered Moringa seeds, when added to murky, bacteria-laden water, acted as a coagulant. After binding to the bacteria and silt, the Moringa falls to the bottom of the vessel and the clean water can then be poured out.
