

The Kufusa Mari Mutasa Project

In March 2008 ASAP Africa and Plan International Zimbabwe entered into a three year project partnership agreement to provide financial services for 2,000 families in the Mutasa District. The ultimate goal of the project is for these families to better care for their children by increasing sustainable family income

ASAP recognizes that the fight against poverty requires a holistic approach, bringing together a broad range of strategies. By combining the *Kufusa Mari* IS&L with other training initiatives and activities, we have developed a unique approach to

community development which is capable of bringing sustainable improvements to the lives of large numbers of poor rural based populations.

Working together with Plan Int'l to bring economic empowerment for women and their families, ASAP looks forward to a successful partnership that will bring noticeable improvements in the quality of life for these children.
